EDGAR BERGEN'S
CHARLIE McCARTHY
Questions and Answers Game

Any number of players may take part in this game, which contains 44 cards, 22 with quastions by Edgar Bergen and 22 with Charlie's answers. Shuffle the pile of Question Cards and the pile of Answer Cards separately.

If 2 persons play, the 2 stacks of cards are placed face down batween them. One begins by drawing a Question Card and raading it aloud. The other player then draws an Answer Card from the top of his pile and reads it aloud. Then the first player reads another quastion, and so on. The haphazard matching of answars to questions provides the fun.

When the cards have been gone through once, they may ba shuffled again. The player who drew the answers before, now draws the question first. There will of course be different answers for the questions, since the cerds are in different order.

If more than 2 persons play, the Question Cards should be divided equally among half of the players and the Answer Cards among the other half. The questions then should be read and answered by the players in turn.

Do you think a good shellacking might help you to brighten up, Charlie?

You may ply me with questions, Bergen, but there are some I wooden deign to answer.
